

HEKIMIAN RACING ENGINES

Hekimian Racing Engines has some of the worlds fastest engines by technological state of the art Applied Quantum Physics Engineering. We provide our clients with power and reliability for their exact Automotive needs.

Using vacuum insulated Cryogenics, Military low friction coatings, Thermal Barriers and Chemical Vapor Deposition thin films, we can reduce wear, increase Horsepower, Torque and longevity.

Hekimian Racing Engines will design and build an engine for your for Street, Racing, Marine, and Pulling. Naturally Aspirated, Supercharged, Turbo or NOS with any fuels.
